

Accessories

Wax Connections Inc.

We have already done the work of looking for the correct parts. The air supply will cut down set-up time for the wax applicator unit. Connect the air fittings and it's done.

Air Supply Kit

#RK3000

- Recommended for use on our units
- Includes all equipment to hook-up to air source.
(Regulator, Mounting Bracket, 30-PSI Gauge, Fittings, and 5' Hose)

The Pre-screening suspends pelletized wax until it melts, this eliminates the solid material from settling in front of the pick up filter in the bottom of the tank.

Pre-Screening Basket

#WB150

- Filters contaminants from wax as you pour new wax into tank.
- Made of 304 stainless steel
- Can be cleaned in a dewax oven

Use this step down transformer to plug your Wax Applicator directly into 220Vac. Hard wired with a European Shucko plug.

Step Down Transformer

#CV500VAST

- 220Vac to 120Vac
- 500 Va
- CE Approved

These accessories highly recommended for use with our control units.
